

The 2014 success is Microvisk's second in the annual MediWales Innovation Awards. In 2011 it was named winner in the "Start-up" category, when its CoagMax® blood testing technology package was still in pre-commercial development.

With over 330 member companies and organisations and partially funded by the Welsh Government, MediWales promotes and supports the NHS, life science and health technology professional communities across Wales.

The award, sponsored by Elite Electronic Systems, was accepted by Microvisk's Head of Quality Julian Beadle and Senior Scientist and Clinical Trials Manager Joe Booth. For further information on the Coagmax® PT/INR Monitoring System visit www.coagmax.com or email support@coagmax.com

[L-R]: **Iain Greenaway** – Microvisk, **Professor Keith Harding CBE** – Cardiff University, **Shaun McBride** – Elite Electronic Systems, **Jonathan Balfour** – Elite Electronic Systems, **Joe Booth** – Microvisk, **Rebecca Burns** – Health Research Wales, **Cait Myers** – Health Research Wales, **Julian Beadle** – Microvisk and **Stephanie Roberts** - Microvisk
